Review

Hogs and Pigs

National
Agricultural
Statistics
Service

United States
Department of
Agriculture

Washington, D.C.

Released December 29, 1994, by the Agricultural Statistics Board. Estimates refer to 1993 and 1994 inventory, pig crop, and operations.

U.S. Hog Inventory Up 3 Percent

U.S. inventory of all hogs and pigs on December 1, 1994, was 59.6 million head. This was 3 percent above December 1993 but 4 percent below the September 1, 1994, inventory. This is the highest December inventory level since 1980.

Breeding inventory, at 6.96 million head, was down 3 percent from December 1, 1993, and down 6 percent from September 1, 1994. Market hog inventory, at 52.7 million head was 4 percent above December 1, 1993, but 4 percent below September 1, 1994.

The September-November 1994 U.S. pig crop was 24.2 million head, 1 percent more than both 1992 and 1993. Sows farrowing during this period totaled 2.96 million head, down 1 percent from both last year and two years ago. Pigs saved per litter was a record high 8.18 for the period compared to 8.05 during September-November 1993. Pigs saved per litter by size of operation ranged from 7.50 for operations with 1-99 hogs to 8.60 for operations with more than 2,000 hogs and pigs.

U.S. producers intend to have 2.86 million sows farrow during the December 1994-February 1995 quarter, 1 percent less than the actual farrowings during the same period last year but 2 percent above 1993. Intended farrowings for March-May 1995, at 3.19 million sows are 6 percent below 1994 and down 1 percent from the 1993 period.

The number of operations with hogs totaled 208,780 during 1994, down 7 percent from last year and 13 percent below 1992. Places with 2,000 or more hogs on hand accounted for 2 percent of the operations and 37 percent of the inventory. A year ago 2 percent of the operations had inventories over 2,000 head and accounted for 33 percent of the inventory.

For information call Thomas Kurtz at (202) 720-3106. Office hours are 8:00 a.m. to 4:30 p.m. ET.

Value per head averaged \$53.20 on December 1, 1994, compared with \$74.90 in 1993 and \$71.20 in 1992. The December 1, 1994, inventory was valued at \$3.17 billion, compared to \$4.34 billion on December 1, 1993.

Revisions

All inventory and pig crop estimates for 1993 and 1994 were reviewed using slaughter and balance sheets. Based on this review, revisions were made to the inventories for June and September 1994 along with the 1994 March-May pig crop. Inventory and pig crops for all the other time periods were also revised slightly, based primarily on the 5-year historic review. The table on page 33 provides a comparison between current and previously published inventories and pig crops for 1993 and 1994 at the US level.

December 1 Inventory & Pig Crop United States

This report was approved on December 29, 1994, by the Secretary of Agriculture and the National Agricultural Statistics Service's Agricultural Statistics Board.

1/ An operation is any place having one or more hogs and pigs on hand any time during the year.

2/ A farrow only operation is any place with breeding hogs or farrowings with no market hogs weighing more than 120 pounds any time during the year.

3/ A farrow to finish operation is any place with breeding hogs or farrowings and market hogs weighing more than 120 pounds any time during the year.

4/ A finish only operation is any place with only market hogs during the year.

5/ Individual State estimates not available for the 34 other States.

Reliability of December 1 Hogs and Pigs Estimates

Survey Procedures: A random sample of 82,000 U.S. producers was surveyed to provide data for these estimates. Survey procedures ensured that all hog and pig producers, regardless of size, had a chance to be included in the survey. Large producers were sampled more heavily than small operations. Data were collected from about 69,000 operations, 84 percent of the total sample, during the first-half of December by mail, telephone, and face-to-face personal interviews. Regardless of when operations responded, they were asked to report inventories as of December 1.

Estimation Procedures: These hogs and pigs estimates were prepared by the Agricultural Statistics Board after reviewing recommendations and analysis submitted by each State office. National and State survey data were reviewed for reasonableness with each other and with estimates from past years using a balance sheet. The balance sheet begins with the previous inventory estimate, adds to it estimates of births and imports, and subtracts estimates of slaughter, exports, and deaths. This indicated ending inventory level is compared to the Agricultural Statistics Board estimate for reasonableness.

Revision Policy: Revisions to previous estimates are made to improve quarter to quarter relationships. Estimates for the previous four quarters are subject to revision when current estimates are made. In December, estimates for all quarters of the current and previous year are reviewed. The reviews are primarily based on hog check-off receipts and slaughter. Estimates are also reviewed after data from the Department of Commerce's five-year Census of Agriculture are available. No revisions are made after that date. This fall, after the 1992 Census of Agriculture was available, the 1988-1992 estimates were reviewed and final revisions were made. Revised 1988-1992 estimates are published in Statistical Bulletin Number 904.

Reliability: Since all operations raising hogs are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplication, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "Root Mean Square Error" is shown for selected items in the table on page 32. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the difference between first and final estimates. The "Root Mean Square Error" for hog inventory estimates over the past 20 quarters is 1.5 percent. This means that chances are 2 out of 3 that the final estimate will not be above or below the current estimate of 59.6 million head by more than 1.5 percent, or about 895,000 head. Chances are 9 out of 10 that the difference will not exceed 2.6 percent, or about 1,550,000 head (the 90 percent confidence level).

Reliability of December 1 Hog Estimates ^{1/}

	Root Mean Square Error	90% Confidence Level		Difference Between First and Final Estimates			Number of Quarters	
		Percent	(000) Head	Average	Smallest	Largest	First Above Final	First Below Final
		Percent	----- 1,000 Head -----				--Number--	
All Hogs & Pigs		1.5 2.6	1,550	648	50	1795	10	10
Pig Crop		2.3 4.0	969	400	6	1163	8	12

Farm Prospects Through 2000

The U.S. Department of Agriculture invites you to take part in a forum on agriculture's economic prospects through the year 2000. The Forum will feature noted speakers on the trends and issues shaping farming's future, and new long-term projections from USDA.

Act Now to Attend. The Forum will be held at the Stouffer Renaissance Hotel in Arlington, Va. For registration information, call the USDA Graduate School at (202) 401-9421; fax (202) 401-7304; or write to the Graduate School, (Dept. IH), Room 108, 600 Maryland Ave., SW Washington, D.C. 20024.

Place Advance Orders for Tapes, Publications. To order audio and video cassette tapes of the Forum, call 1 (800) 747-0856; in Maryland, call (301) 662-0371. The Forum proceedings will include all submitted speeches plus the new USDA projections; request item YCON-95, \$25. Long-term Baseline Projections also available separately; request WAOB-94-1, \$12. Both Available by April 1995. Call 1 (800) 999-6779.

February 22 and 23, 1995 in Arlington, Virginia

U.S. Department of Agriculture Washington, D.C. 20250-3800

Statistical Bulletin Order Form

The U.S. Department of Agriculture's National Agricultural Statistics Service will publish a series of 18 Statistical Bulletins (SB895-SB912) containing final estimates for the 1987-1993 period. Data previously published during the 1987-1993 period have been reviewed against survey indications and administrative data such as those from exports, imports, slaughter, crushings, and the 1992 Census of Agriculture. These bulletins are a continuation of Statistical Bulletins (SB792-SB802) published in 1988 and 1989.

QUANTITY (\$10 each)		BULLETIN NUMBER	STATISTICAL BULLETIN	RELEASE DATE
PAPER	DISKETTES			
		SB-904	Hogs and Pigs, 1988-1992	12/16/94
		SB-896	Field Crops, 1987-1992	12/19/94
		SB-897	Stocks of Grains, Oilseeds, and Hay, 1988-1993	12/19/94
		SB-898	Rice Stocks, 1988-1993	12/19/94
		SB-902	Vegetables, 1987-1992	01/06/95
		SB-906	Sheep and Goats, 1989-1993	01/13/95
		SB-908	Chicken and Eggs, 1988-1993	01/18/95
		SB-905	Cattle, 1989-1993	01/20/95
		SB-909	Milk, 1988-1992	02/02/95
